## **Trade & Win**

**(Because your pocket lies in your hands)**

**Defining financial market in simplest of words will definitely read of as a place to curb and create your financial needs. Each and every rational being on this earth, has some financial needs, more or less. Dreams and desires, are the base, needless to say.**

**It is cent percent clear that the money making capabilities of stock markets are immense and humongous. We have had market moguls such as Mr Warren Buffett, Mr George Soros, Mr Rakesh Jhunjhunwala and still counting, who have evidently proved and defined, and are still manifesting the richness stock markets can offer.**

Keeping this in mind, we have created a framework where in, you can learn, prove your mettle and practice your skill, and the best part- you will be rewarded. On a positive note, we are heartily inviting you to a competition, where your trading skills will be your best friend and are going to be extremely beneficial for you. It is a golden opportunity for every trader because such competitions are rare and one should not miss them. As it has been said, 'if you are participating, you have equal chances of winning as of the winner, there can be a winner in you, but if you aren't participating you don't even stand a single chance to win.' It is our trustworthy recommendation to every non-trader to participate also, as it will be an enticing experience for everyone. You never know, when that little spark of financial success in you, can turn into a powerful flame, so don't miss the golden opportunity to participate into this.

## Process

Every single participant will be provided a PC with a working internet connection. The competition accompanied by a small workshop, shall begin at 9:30 am, participants can start reporting from 9 am. The workshop is intended to provide you a brief idea about trading and how to do it?

Every participant on his computer will get access to a trading simulator, which will be common for all, and will be given an equal amount of virtual money. All prices, movements and trends on that day will be the same as of the real market. You can sit on the computer and trade till 3 pm. By the

end of the day, whosoever manages to get the highest profit, wins the competition. Only intraday trades will be counted as valid trades. F&O, Swing trading or delivery based holdings will not be counted. Every trader will get access to all the studies, latest data, charts and news. Personal Advisory is prohibited.

#### Requirements and awards

- 1) Participation fee is Rs.900
- 2) You may bring your own laptop.
- 3) Prize money is Rs. 18000
- 4) A workshop to brief the students about intraday trading and stock markets will be offered in the beginning hours of the competition. The workshop shall tell you about the functioning of markets, buy and sell signals, to do and what not dos' etc.

# THE MODULE – TRADE AND WIN

## 1. INTRODUCTION TO STOCK MARKETS

To begin with, we would like to describe how stock market works in a brief way. The motive of this module is intended, to create a basic level of structure and functioning of stock markets. We will talk about types of stocks, market participants, success stories etc. for an hour.

## 2. SIGNALS- A BRIEF INTRODUCTION TO TECHNICAL ANALYSIS

The whole stock market function on one line- buy low and sell high, but how to find that this price of a stock is low and will go high or is high and will go low. To curb this problem, chart studies were made. This is what we call technical analysis.

### I) Candlesticks- Introduction and Use

Candlestick patterns are used widely among traders all over world because of the signals they deliver. Their popularity among traders is unmatched and so is the information they provide us.

- a. *Single candlestick patterns*
- b. *Multiple candlestick patterns*

### II) Indicators

*Various indicators are used to determine the next steps. They are considered important and can help traders prevent losses as well as make some profits.*

#### a. RSI

### *b. Moving Averages*

*We will bring an end to your brief interaction with basics of stock markets here and proceed to commence the competition. We will try our best to make all the concepts clear and interesting to our level best, on the basis of time limit and understanding level.*

*Best wishes to all! We hope to see you all soon.*
